

THE
BEND

WHITE PAPER

The BEND Game is a multiplayer 3D racing game where users can both earn income by competing in the game and earn more with the income stations in it.

Features of Super Cars

Each of the super cars in the game has its own limit of quantity.

Each super car has different handling, speed, acceleration and endurance power.

So, the difficulties of driving it are different.

It is possible to strengthen the super cars by modifying them.

Super cars are designed as realistically as possible in the possibilities that mobile devices allow.

The km features of the super cars are active. In other words, the first maintenance of the car should be done when it reaches 150,000 km.

If it is not done, some of its features will decrease in percentage in races.

When the super car reaches 300.000 km, heavy maintenance should be done.

The mileage will be reset after heavy maintenance of the super car is done.

The fuel feature of the super cars will also be active.

If the super cars win in the big race, + points will be added to the features of the winning super car.

Super cars can be damaged in races.

RACES ON THE BEND

There will be 5 types of modes in the races.

LEAGUE MODE

FREE MODE

DUO RACE MODE

QUADRA RACE MODE

GRAND TOURNAMENT

The features of the super cars in the races, the ability of the user to use the super car and the luck factor will be effective.

As super cars take damage, their efficiency will gradually decrease, if they take more than 50% damage, they will be out of the race.

For the car to participate in the next race, it must be repaired in the garage.

WINNING STATIONS

Betting races: Users will be able to race against each other in Duo and Quaternary Races with bets and the winner will receive the bet BEND token.

Super Car Gallery

Here, users will be able to buy, sell or rent super cars between each other. Since the number of super cars will be limited, users can add an X model super car to the market to sell or rent it to another user at the price they have determined, after we have sold the entire quantity limit determined for that X model. The prices will be determined entirely by the users themselves.

Maximum Supply; 1.000.000 BEND
